Address: Plot No. 81, Sector 05, IMT Manesar, Gurgaon, 122051, Gurgaon, Gurgaon

Price: Check with seller

Plastic Baler: A baling press machine, often simply referred to as a "baler," is a piece of industrial equipment used to compress and bundle various materials into compact, manageable bales. These machines are commonly used in recycling facilities, manufacturing plants, and other industries where materials need to be efficiently processed and transported. The primary purpose of a baling press machine is to reduce the volume of materials, making it easier and more cost-effective to handle, transport, and store them.
