Career after class 12 in India: 'What after 12th?' is a question that echoes among students in the 12th standard, both in India and abroad. The annual dilemma revolves around career prospects, job opportunities, and, most importantly, individual passions and preferences. The root cause of this confusion, according to counselors, lies in the lack of proper information about the diverse courses available in India and their corresponding career prospects. In India, students can choose from Science, Commerce, and Arts streams, each offering a plethora of courses to pursue after 12th.
