Scar Removal Treatment In Delhi: Scar Removal Treatment In Delhi

Scar is a normal process of tissue healing. It is the replacement of normal skin with fibrous tissue. It occurs after any injury, infection or after any surgical procedure. Irrespective of the etiology the scars can be disfiguring as it stands out prominent against the rest of the surrounding skin.

Scar will always be there where body tries to heal the wound but the characteristic of scar depends on what type of wound it is and its management, therefore good wound care by specialist is of prime importance in getting a good scar and meticulous surgical wound closure will help achieving a fine thin line scar.

Scar revision surgery helps to improve the scar appearance both physically and functionally to regain confidence.

Scar Removing Procedures

Scar management can be done both surgically and non-surgically depending on type of scar.
