Address: Sudama Nagar Indore, Madhya Pradesh, India, Indore, Indore

Price: Check with seller

How To Integrate WhatsApp For Website: Boost your business communication to the next level with our innovative Call Patching Service which comes with user friendly UI, easy API Integration & more. The term "Call Patching Process" also known as "Call Patching" describes a call that a business places to its clients for more information about business services. When a client receives a call, the company's pre-recorded voice file (OBD) is played, and if the client wants to communicate with an agent, the client must press their respective digit on the phone. Thus, calls are connected without any delays.
