Price: **280,000.00 ?**

Office Space for Rent in Andheri: Designing your office space right from the scratch can give you a big hole in your pocket as there many factors to be considered for developing a professional property like designing and customizing a raw place to your needs all the mechanical work to be done all this will take more time and also your more money is invested before starting up your business which is not a good sign so it's better to go for furnished office space it might be little expensive than an unfurnished space though spending a little extra money on the furnished place is a better option for the beginners than investing valuable funds and time. This can be a good deal for any people who have recently had start-up and lows on a fund to invest a big amount in constructing place.
