Free

Double Chamber Helium Leak Testing Machine | Nxttek: A Double Chamber Helium Leak Testing Machine is designed for high-speed, high-accuracy leak detection using helium as the tracer gas. Nxttek With two testing chambers operating alternately or in parallel, it maximizes productivity and ensures non-stop inspection of components. The use of specially tested components for high switching frequency and enhanced stressing also enhances reliability. For More Info : <https://www.nxttek.co.in/HLT.aspx>
